DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1,8-14,16-26,28-30,32-34 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S.

Patent No. 6,193,388. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1,8-14 of the instant invention applicant discloses the structural limitations in claims 1-6 of the '388 reference.

Although in the instant invention applicant recites "means" functions for the holding of the light bulb, retaining at least one battery, selectively electrically coupling the means for holding the light bulb to the means for retaining at least one battery and for retaining the lens in a fixed position relative to the means for holding the light bulb, wherein the means is movable to cause the reflector to move relative to the means for holding the light bulb, these means functions are defined and identified in the aforementioned claims of the '388 reference. With regards to claims 16-26,28-30 and 32-34 of the

instant invention, the limitations in these claims are stated in claims 6-12 of the '388 reference.

Allowable Subject Matter

3. Claims 2-7,15,24,27,31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
